PROFESSIONAL SUMMARY

Aspiring Java Full Stack Developer with strong skills in Java, Spring Boot, REST APIs, MySQL, HTML, CSS, and JavaScript. Possesses a solid foundation in Data Structures, Algorithms, Object-Oriented Programming (OOPs), and Database Management Systems (DBMS), along with hands-on experience in developing backend systems, machine learning models, and computer vision applications. Passionate about building scalable, efficient software solutions, continuously learning new technologies, and solving real-world challenges through innovative and impactful development.

SKILLS

- **Programming Languages:** Java, Python, C
- **Frontend:** HTML, CSS, JavaScript
- **Backend:** Spring Boot, REST APIs, JDBC
- **Database:** MySQL
- **Tools:** Git, GitHub, Postman, IntelliJ IDEA, VS Code

INTERNSHIPS

Software Development Intern — BlackPapers

May 2026 – July 2026

(A Unit of Tributaries Unicorn LLP)

- Working on frontend development using React.js to build responsive and user-friendly web applications.
- Developing and integrating features for a CRM system to streamline customer and business workflows.
- Collaborating with developers and stakeholders on real-world projects following industry-standard practices.
- Contributing to feature development, testing, debugging, and performance optimization of applications.
- Utilizing Git, REST APIs, and modern development tools to support efficient software delivery.

PROJECTS

Smart Traffic Accident Hotspot Analysis & Risk Prediction System

Jan 2026 - March 2026

- Developed a data-driven system to identify accident-prone locations (blackspots) using large-scale accident datasets (7M records) and geospatial analysis.
- Implemented machine learning models (Random Forest, Gradient Boosting) to predict accident severity using weather, temporal, and spatial features.
- Built a FastAPI-based REST backend for hotspot detection, route safety analysis, and real-time risk prediction.
- Designed an interactive frontend using HTML, CSS, JavaScript, and Leaflet.js to visualize accident heatmaps, clusters, and risk levels.

Human Posture Detection System Using Geometric Angle Estimation

Oct 2025 - Nov 2025

- Developed a real-time computer vision system to detect and analyze human body posture using live camera input.
- Implemented pose estimation techniques to identify body landmarks and track movement patterns.
- Applied image processing and landmark detection algorithms for posture classification and monitoring.
- Explored applications in posture correction and ergonomic health monitoring.

CERTIFICATIONS

- Presented the research paper Human Posture Detection System Using Geometric Angle Estimation at **ICICST 2026**, NIT Jalandhar. **April 3–5, 2026**
- Completed Java Programming for Complete Beginners certification from Udemy. **June 2024 - July 2024**

EDUCATION

- **Sharda University** **2023–Present**
B.Tech in Computer Science
- **Central Academy School** **2022–2023**
Class XII (CBSE)
- **Central Academy School** **2020–2021**
Class X (CBSE)
